## PROFILE

Results-driven technology leader with a proven record of leading enterprise-level change. Extensive experience working with Fortune 500 companies. Demonstrated ability to adapt in a fast-paced environment, manage expectations of demanding clients, and deliver quality products. Knowledgeable in the areas of DevOps, Site Reliability Engineering (SRE), Application Security (AppSec), software development best practices, and Agile delivery.

## SKILLS & TOOLS

Solutions Architecture • IT Strategy • DevSecOps • Site Reliability Engineering (SRE) • AppSec  
C# / .NET Core / MVC / Web API • SQL & MongoDB • Azure • Infrastructure as Code (IaC)  
Agile / Scrum / Kanban • CI / CD • Azure DevOps • GitHub • Terraform • SAST • DAST

## EXPERIENCE

### **Founder, DevSecOps Consultant**

Oct 2020 – Present

*99Summits, Inc.*

Used Microsoft technologies to custom develop DevSecOps solutions. Key projects include the creation and integration of incident response tools (e.g. PagerDuty), ALM tools (Azure DevOps, TFS, GitHub), and implementation of AppSec SAST and DAST tooling (e.g. Fortify, SonarQube, WebInspect).

### **Senior Manager / Architect, DevOps Tools & Automation**

May 2018 – Oct 2020

*Deloitte*

Recruited and led innovation focused DevSecOps tooling and cloud architecture teams to serve as an accelerator in Deloitte's cloud first strategy. As a team, drafted Azure reference architecture and developing SDLC auditing platforms to support scalable autonomy in a highly regulated environment.

- Created the "My DevOps" platform, a suite of tools integrated with Azure DevOps, ServiceNow, Veracode, and others for auditing and reporting DevOps maturity at various levels of the organization.
- Formed cloud architecture group to provide guidance, best practices, and starter kits leading to the delivery of over 50 new Azure applications.
- Partnered with Deloitte Global, Canada, and other Deloitte IT organizations to expand our scope of services and create additional revenue opportunities for the US firm.

### **Senior Manager, IT Infrastructure & Cloud Services**

Apr 2017 – Feb 2018

*Think Finance*

Senior Manager over Systems Engineering, Application Engineering, and Network teams focused on driving cloud adoption and expanding DevOps practices.

- Led cloud migration strategy using Azure IaaS and PaaS as well as AWS storage for backups and recovery while focusing on security and compliance requirements.
- Increased Infrastructure-as-Code adoption through PowerShell, Python, and ARM templates to include network configuration, firewall ACLs, server provisioning, configuration, and deployment.
- Sponsored cross-functional guilds to share knowledge and best practices across the organization.

**Manager, DevOps / Application Engineering**

Oct 2014 – Apr 2017

*Think Finance*

Recruited and grew world class Microsoft DevOps team. Liaison between Development, QA, and Infrastructure organizations. Responsible for core environment stability while increasing agility.

- Primary leader for DevOps and continuous delivery initiatives. Worked cross functionally to build a blameless, results driven culture across the organization. Worked with Architecture to move from monolithic to microservices design focused on non-breaking changes.
- Architect and product owner for the creation of environment on-demand platform. Utilizing custom developed C# / MVC front end with PowerShell DSC (Desired State Configuration) and SMA (Service Management Automation) to allow for self-service deployments and the creation of new product environments reducing lead time 20x.
- Drove quality and monitoring initiative to improve the stability of non-Prod environments over 50%. Improved SLAs and reduced mean time to resolution on operational requests by more than 200%.

**Manager, SCM / DevOps**

Feb 2009 – Oct 2014

*Deloitte*

Led multidisciplinary, 17-member team in the US and India. Provided mentorship and guidance to junior resources. Managed the implementation of multimillion-dollar projects, automation initiatives, and other process improvements.

- Hired and trained new India teams to allow 24x7 operational coverage. Expanded internship program to reduce the cost model for U.S. based resources. Championed training sessions for TFS, Scrum, Build Forge, C#, MVC, IIS, and various other technologies.
- Architected automated deployment and change management processes using IBM Rational Build Forge, HP PPM, and CA Service Desk to manage hundreds of applications across various domains and environments with minimal staff.

**Various Developer & Systems Engineering Roles**

Apr 2005 – Feb 2009

*Deloitte*

Served as a Systems Engineer, Software Engineer, and Senior Web Engineer for a variety of products within Deloitte.

- Designed and maintained an enterprise level tax application used by 65,000 users with C#, ASP.NET and Oracle; wrote business critical functionality for a messaging application using C# and Oracle stored procedures.
- Provided guidance on infrastructure, deployments, and maintenance for hundreds of applications. Worked with numerous teams across the firm to improve the way Deloitte delivers projects.

## EDUCATION AND TRAINING

**CompTIA Security+**

Sep 2022

**Certified SAFe 4 Agilist**

Nov 2018

**Bachelor's of Management Information Systems**

May 2005

The University of Texas at Dallas

GPA: 3.6
